1. PROFESSIONAL SUMMARY

Software Engineering student and Backend Developer with 2+ years of experience in Laravel, PHP, MySQL, and RESTful APIs. Experienced in systems analysis, requirements gathering, and enterprise software development. Contributed to ERP, educational, and assessment platforms while applying software engineering best practices.

2. EDUCATION

Bachelor's Degree in Information Technology Engineering | Damascus University

Major: Software Engineering | 2026

3. TECHNICAL SKILLS

- Backend: Laravel, PHP, NestJS, REST APIs
- Systems Analysis & Requirements Engineering
- Database: MySQL, PostgreSQL
- Frontend: JavaScript (jQuery, TypeScript), Bootstrap

- Software Testing & Quality Assurance: QA, Functional Testing, Test Cases, Bug Tracking
- Software Engineering Principles: OOP, SOLID, Design Patterns
- Tools: Git, GitHub, GitLab, Jira

4. EXPERIENCE:

4.1 Software Engineer | Backend Developer, Systems Analyst & Quality Assurance Engineer | JoyBox | 2025 – Present

- Develop and maintain enterprise web applications and backend services using Laravel, PHP, MySQL, and modern software engineering practices.
- Participate in systems analysis activities, requirements gathering, business process analysis, and project requirements coordination to ensure alignment between business needs and technical implementation.
- Design, develop, and maintain RESTful APIs, database schemas, business logic, and reporting modules for multiple enterprise systems.
- Develop dynamic reporting and assessment systems for the Maqayees platform, including psychological assessment reports and analytics modules using Laravel Blade.
- Optimize database performance, improve data integrity, and implement scalable database structures using MySQL.
- Support project quality management activities and ensure compliance with functional and technical requirements across multiple software projects.
- Contribute to the successful delivery and maintenance of multiple systems, including: Key Projects: Zahi ERP, Aalamy Schools Management System, Maqayees Assessment Platform, CentralTest Platform (Ministry of Awqaf), Manazel Al-Abrar Platform (Ministry of Awqaf), Medicine Reader, and Riyadh Al-Saliheen TV Channel Platform.

4.2 Laravel Developer — Freelance | September 2025

- Developed the backend architecture and business logic for an electronic payment platform supporting product purchases, invoice payments, and shopping cart checkout processes.

- Designed and implemented secure RESTful APIs and database structures using Laravel and MySQL.
- Integrated PayPal and Mollie payment gateways, including secure authentication, payment processing workflows, transaction handling, and API-based communication.
- Developed and maintained product catalog, shopping cart, order management, and payment processing modules.
- Built responsive user interfaces using Laravel Blade and Bootstrap, ensuring compatibility across desktop and mobile devices.
- Implemented secure payment validation mechanisms and optimized transaction workflows to enhance reliability and user experience.
- Collaborated within a development team using GitLab version control and Agile development practices.

4.3 No-Code SaaS & CRM Builder Platform | 2026 (Academic / Analysis Project)

- Participated in system analysis, requirements engineering, and Software Requirements Specification (SRS) design for a multi-tenant No-Code SaaS platform.
- Contributed to the design of a dynamic application builder enabling users to create custom data models, workflows, web pages, CRM modules, and automation rules without coding.
- Designed business processes, use cases, functional requirements, permission matrices, and system workflows.
- Collaborated in defining scalable architecture using NestJS, PostgreSQL, Redis queues, event-driven automation, and multi-tenant architecture.
- Produced technical documentation including use case diagrams, activity diagrams, sequence diagrams, and ERD models.

Technologies: NestJS, PostgreSQL, Redis, JWT, Multi-Tenant Architecture, Event-Driven Architecture, Stripe Integration.

4.4 Laravel Backend Developer — Tafawuq School Institute System | 2025

- Developed a comprehensive educational management system supporting academic, administrative, and financial operations with web and mobile integration.
- Designed and implemented scalable RESTful APIs using Laravel, applying SOLID principles and layered architecture patterns (DTOs, Services, Repositories, Actions, Policies, Traits).
- Developed core modules including student management, attendance, examinations, grading, courses, reporting, and document management.
- Implemented role-based access control using Spatie Laravel Permissions and developed SMS and in-app notification services.
- Optimized database structures and backend performance while collaborating within a Scrum team using Jira and GitLab.

5. PROJECTS

5.1 Angular Compiler Project 04/2025

- Designed and developed a custom Angular compiler with Lexer, Parser, AST generation, and semantic analysis.
- Implemented Symbol Tables and Visitor Pattern for syntax tree traversal and code validation.
- Generated intermediate representations and target code through custom code generation mechanisms.

Technologies: Compiler Design, Lexer, Parser, AST, Symbol Tables, Visitor Pattern, Code Generation.

5.3 SCHOOL MANAGEMENT SYSTEM 10/2024

- Developed a Laravel-based school management system featuring student management, examination tracking, scheduling, and fee management.

Technologies: Laravel, MySQL, RESTful APIs, GitHub.

GitHub: [github.com/Bilal-Al-Laham/Schools Management System](https://github.com/Bilal-Al-Laham/Schools_Management_System)

5.4 Odoo ERP System Implementation | Odoo | 2025

- Customized and configured Odoo modules to support business requirements and improve operational workflows.
- Managed and maintained data records, user roles, and access permissions across multiple modules.
- Participated in requirements analysis, system testing, and business process optimization.
- Created and customized reports, forms, and dashboards to support decisionmaking and operational monitoring.
- Assisted in troubleshooting system issues, validating workflows, and ensuring data accuracy.
- Collaborated with stakeholders to gather requirements and align ERP functionalities with organizational needs.

Technologies: Odoo ERP, PostgreSQL, XML, Python, Business Process Analysis.
